About

Multidisciplinary, rigorous and meticulous; my profile is shaped by such varied national and international experiences as enriching, which reflects both my passion for personalized and tailor-made projects, but also my enthusiasm for anything that pushes me out of my comfort zone. For the future? I am currently looking for a collaboration with a major player who wants make things happen, like your business.

Professional experiences

Technology

`Symfony 4` `Sass` `Webpack`
`Twig`

PROJECTS

Manevra
Online legal service platform consisting of offering legal assistance and support but also the sale of administrative and legal documents.

Intervention

- User management:
    Implement and manage users in this Symfony project, by setting up authentication
    and role-based security for each user.

- Implementation of payment and subscription:
    Implemented online payments using <<Stripe>>, and
    For subscription, give permissions for a user in a
    duration clearly determine then remove this permission when its subscription
    is completed depending on the type of subscription he makes.
 - Processing customer returns.

`Django 3` `Sass` `JQuery`
`HTML`

PROJECTS

e-Harogna
The Project consisted of creating an online professional training platform in which each subscriber could have the possibility of online Coaching, in professional orientation.

Intervention

    Almost the creation of an entire site except the deployment.

- Back - End side:
    Creation of all the necessary models (tables) and views (controllers).

- Front side - End:
    Integration of all pages via figma models.

Educational Projects

Technology

`JAVA` `Spring` `Spring boot`
`Spring MVC` `Spring DataJPA`
